Why This Ride Is Special

This loop packs **multiple personalities of the Sahyadris** into one ride:

- **Varandha** gives you raw mountain drama
- **Tapola** gives you stillness
- **Mahabaleshwar** gives you cool forest charm
- **Ambenali** gives you thrilling downhill curves
- **Tamhini & Mulshi** close it out with lush, peaceful beauty

It's one of those rare circuits where **the road itself is the destination.**

My Ride Experience

Varandha Ghat

Varandha was a bit rough this time because of **ongoing road work** and broken patches in sections.

So this isn't currently a "smooth fast sweepers" kind of stretch.

But then...

The **sunset from atop Varandha** was absolutely unreal.

That golden light over the valley, the cliffs fading into the distance, and the whole sky opening up over the Sahyadris -
worth every rough patch.

Mahabaleshwar Stretch

This section was pure joy.

The roads around **Mahabaleshwar** were **beautifully laid out**, wrapped under **dense tree cover**, and the entire stretch had that classic hill-station riding feel.

What stood out most was the weather -
even under the **mid-day sun**, the climate stayed surprisingly **pleasant and comfortable.**

One of those sections where you don't want to rush at all.
You just want to keep riding.

Best Parts of the Circuit

- The dramatic entry into **Varandha**
 - The peaceful transition toward **Tapola**
 - The cool, shaded roads of **Mahabaleshwar**
 - The fast, flowing descent of **Ambenali Ghat**
 - The lush green corridor of **Tamhini**
 - The calm, ride-home feeling around **Mulshi**
-

Road Notes

- **Varandha Ghat:** currently rough in patches due to road work
 - **Mahabaleshwar roads:** excellent and highly enjoyable
 - **Ambenali:** rewarding curves, but ride within limits
 - **Tamhini / Mulshi:** always scenic, especially if weather is kind
-

Would I Recommend It?

100%.

If you want a ride that feels like:

- **mountains**
- **mist**
- **forests**
- **sunset viewpoints**
- **soulful roads**

...this circuit absolutely delivers.

It's not a "rush and finish" route.

It's a route to **feel**.
